

Axiom

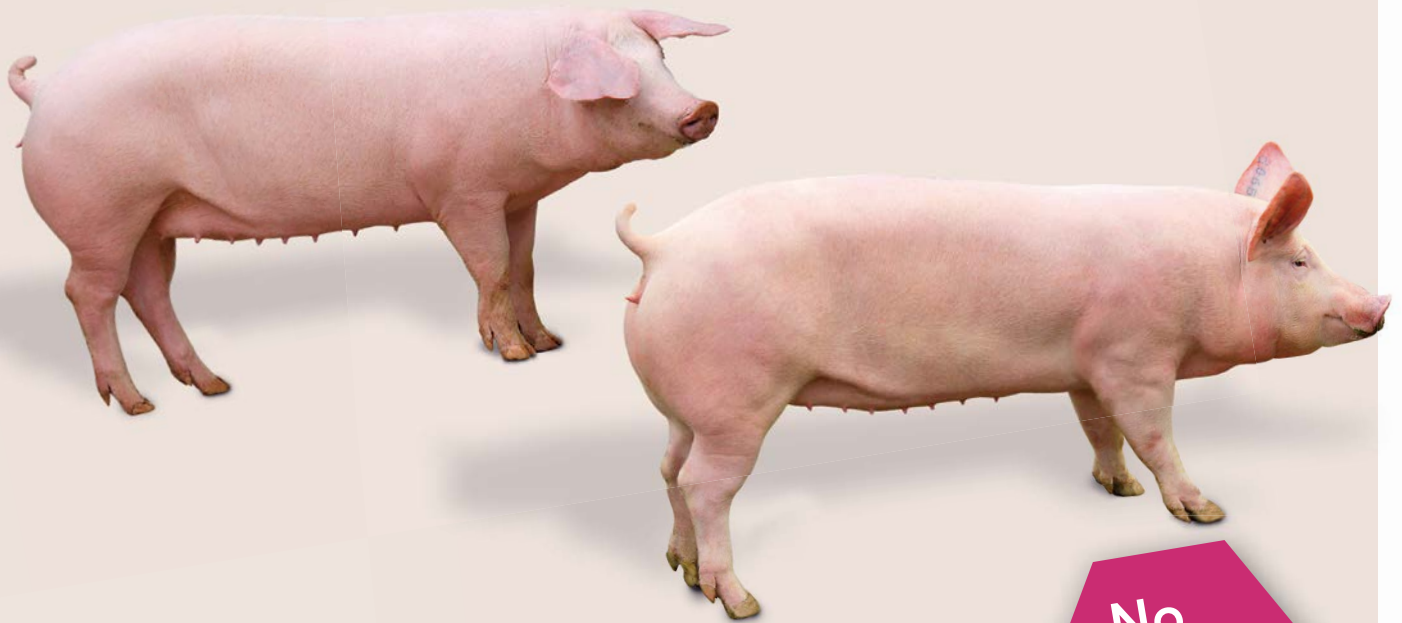

The 35-hour sow

Powered by

No manual palpation, no piglet fostering.

- 16-18 functional teats, 108 kg litter weight
- 50% reduced mortality amongst sows and piglets, <7% preweaning mortality, >7 litters

Excellent performance traits:

- >16 liveborn
- <35% replacement rate

The 35-hour sow has a very high degree of predictability and an excellent working attitude. Let the sow do the work for You.

Quality assurance:

- ++ 18,000 GGP sows = extreme selection pressure
- ++ 1 million litter gain weighings = functional teats and high milk production guaranteed
- ++ 35 million animal performance evaluations (carcass quality, feed conversion and daily gain)
- ++ Health: free from PRRS, App and Mycoplasma
