

Borix

Terminal boar semen

Powered by

No hernias. 50% reduction in stillborn and mortality.

- <0.5% slaughter piglets through hernias
- <5% stillborn
- <7% preweaning mortality
- Fast and uniform, low feed costs per kg gain
- Extremely suitable for export to Spain, Germany and the Dutch market

No
contract
required

Excellent performance traits:

FCR <2.09, daily gain >1250 gr/d (25-125 kg)
Backfat <6 mm, loin muscle depth >73 mm

Quality assurance:

- ++ 18,000 GGP sows = extreme selection pressure
- ++ 1 million litter gain weighings = uniform birth and weaning weights guaranteed
- ++ 35 million animal performance evaluations (carcass quality, feed conversion and daily gain)
- ++ Health: free from PRRS, App and Mycoplasma
